W/HEAD POLE HITCH

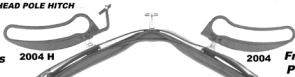

**WINGS**

**Two Styles  
Available**

2004 H

2004

**Free with  
Protecto  
Harness**

**FLY LIKE AN EAGLE**

## **MAKES YOUR HORSE MORE CONTROLLABLE**

1. Will replace a side reining bit.
2. If a horse gets on one line, it will allow you to move the line over to the outside to get a different angle of pull allowing better control of your horse.
3. Many horses get on one line going around a turn, the wings will allow easier steering for that horse.
4. Best to use 2 on each harness, a horse can bear out in the stretch and bear in on the turns, the wings will automatically adjust for both problems.
5. Makes for a better mouth on any horse because of the angle of pull. Pulling straight back will cause a horse to offset their jaw.
6. Excellent when breaking yearlings, it teaches them to turn easily avoiding those bad habits.
7. What ever way the horse points his head, the wings will allow the reins to move with him and adjust to his head movements.

**A real must for big horses... works great on them.**
